

Additional Agenda for discussions in the 42nd meeting of the STU
Coordination Committee to be held under the chairmanship of Addl.
Chief Secretary (MPP & Power)

1. Augmentation of Transformer Bank at Kotla sub station of HPSEBL :-

- Kurmi HEP (8 MW), located on Nanti Nallah, has been commissioned and is feeding its power in to 2/66/220 kV Kotla sub station of HPSEBL at 66 kV level.
- Developer of Kurmi HEP has represented that they are not in a position to operate their plant above 6.8 MW due to restriction from HPSEBL as a result of which there is a generation loss of 7.2 lac units every month since April, 2015.
- It has been informed that restriction is being imposed owing to under capacity of transformer bank at Kotla.
- Developer of Kurmi HEP has further informed that their another HEP viz. Kut (24 MW) HEP is expected to start generation and shall also inject power in to Kotla sub station at 66 kV level. They apprehend that due to under capacity of transformer bank at Kotla they would not be able to evacuate power of Kut HEP.

HPSEBL may update the committee on the augmentation of transformer bank at Kotla.
